SUBJECT INDEX: 1986 (Vol. XXIII)

Page numbers referring to 'Book Reviews' are italicized

A

Acetylator phenotype
in type I diabetes 351

Adipose tissue
structure, function and development
a book *181*

Albumin excretion rate
effect of pentoxifylline 171

Alkaline phosphatase
in diabetic patients 29

α_1-acid glycoprotein
in strepotozocin diabetic rats . . 243

α-D-galactisidase 117

α-D-glucosidase 117

α-D-mannosidase 117

α-L-fucosidase 117

Amniotic fluid prolactin
in pregnant diabetics 233

Analysis of variance 23, 77, 117

Anesthesia
and glucose turnover in rats . . 35

Ano-rectal manometry
in diabetes mellitus 331

ANOVA tests 165

Apolipoproteins (AI, AII, B)
and BHI in type I diabetes . . . 63

Arginine
induced insulin release and hCT . 13

Arterial hypertension
in type I diabetics 351

Artificial pancreas
hyperglycemic clamp in recently
diagnosed type II diabetes mellitus 215

Atropine
effects of – on tests for
autonomic neuropathy 141

Autonomic neurophathy
and ano-rectal manometry . . . 331
computerized analysis 141
intraindividual variability of tests of – 279
in type I diabetics 279, 323

B

Baclofen
in diabetes mellitus 23

BB Wistar rats
and high protein diet 107

B-cell function
in type I diabetic patients
with and without retinopathy . . 339
in type I and type II insulin
treated diabetic patients 345

Beta estradiol in obese males 261

β-D-galactosidase 117

β-D-glucosidase 117

β-D-glucuronidase 117

β-N-D-acetylglucosaminidase 117

β-OH-butyrate
and intraperitoneal insulin infusion 155

Bilirubin
in diabetes mellitus patients . . 79

Biosynthetic human insulin (BHI)
and lipid concentrations 63

Biothesiometry 135

Blood glucose levels
and CSII treatment 1
fasting – and mean red cell volume 249

Blood rheology
and pentoxifylline 171

Brittle diabetes
and chronic continuous intraperitoneal insulin infusion 155
and CSII treatment 1

C

Calcitonin (human: hCT)
effects of – on insulin secretion . 13

Cardiac autonomic damage
in diabetic patients 141

Cardiovascular reflex tests
intraindividual variability . . 279, 323

Cassava 91

Cellular immune response
to insulin in type I diabetes . . . 309

Chi-square test 29, 57, 309, 351

Chlorpropamide alcohol flush (CPAF)
in type I diabetics 351

Cholecystokinin analogs (CCK-4)
and insulin release 239

Cholesterol (total, HDL)
and BHI in type I diabetes . . . 63
and guar pasta diet in obese subjects 77
concentration and metabolic control 127

Cholinesterase
in diabetic patients 29

Chronic liver disease
in diabetic patients 29

Clinical assessment of glycemic control . 227

Clinical signs of autonomic neuropathy
in type I diabetics 279

Cold stress test
in diabetic patients 185

Complications of type I diabetes
genetic and metabolic risk factors . 351

Computerized analysis
of cardiac autonomic damage . . 141

Continuous intraperitoneal insulin infusion
and metabolic control 155
for the pregnant diabetic patient . 201

Continuous i.v. insulin infusion
for the pregnant diabetic patient . 201

Continuous s.c. insulin infusion (CSII)
a long-term study 1
and metabolic control 1
and skin lesions 1
and technical failures 1
for the pregnant diabetic patient . 201
in brittle diabetes 1

Coronary heart disease in type I diabetics 351

C-peptide
after glucagon and retinopathy in diabetics 339
after glucagon in type I and type II insulin treated diabetic patients . 345
after SHI administration . . . 101
response to oral glucose plus ranitidine 165

D

Decidual prolactin in pregnant diabetics . 301

Deep breathing test
in type I diabetics 279, 323

Diabetes mellitus
and chronic liver disease . . . 29
and echocardiographic test . . 185, 193
and GABAergic system 51
and hepatic B virus 29
diagnosis of – 57
in the tropics 91
malnutrition related – 91
red cell volume in – 249

Diabetic autonomic neuropathy
analyzed by computer 141
intraindividual variability of tests of –. 279, 323

Diabetic ketoacidosis
renal involvement in newly diagnosed type I diabetic child . . 369
Diabetic nephropathy
effects of pentoxifylline on microproteinuria 171
Diabetic neuropathy 69
Diabetic rat
and glucose turnover under anesthesia 35
in vivo observation of macromolecular transit across the vascular wall . . 83
Diabetic retinopathy and residual B-cell function 339
Diarrhea in diabetes 331
Diet control
effects of – on insulin receptors . 233
Dyslipoproteinemia and diabetes
a book *182*

E

Eating and its disorders
a book *183*
Echocardiography (M-Mode)
during hand grip exercise . . . 193
left ventricular function in diabetic patients 185
Electroneurography
in diabetes mellitus 69
in tropical diabetes 155
Electrophoresis of serum protein
in diabetic patients 29
Endothelial permeability in diabetic rats . 83
Epinephrine
and glucose turnover in rats . . 35
Erythrocyte filtrability
and pentoxifylline 171
Estrone in obese males 261

F

Fecal incontinence
and anorectal manometry in diabetes 331
Fisher's exact test 351
Free insulin
levels after intraperitoneal infusion 155

G

Gamma-aminobutyric acid (GABA) system
and diabetes mellitus 23
and impaired insulin secretion . . 23
and prolactin release in diabetes mellitus 51
and sodium valproate 51
Gamma-glutamyltranspeptidase
in diabetic patients 29
Gastrointestinal disorders in diabetes mellitus
a book *181*
Genetic risk factors for the development of late complications in type I diabetics 351
Glibenclamide
effects of – on insulin receptors . 233
Glucagon secretion
and cholecystokinin analysis . . 239
Glucagon (plasmatic)
after IVGTT and baclofen . . . 23
Glucagon test
and retinopathy 339
in type I and type II insulin-treated diabetic patients 345
Glucose
clearance under anesthesia in rats 35
induced insulin secretion and hCT 13
levels after ranitidine infusion . . 165
production in recently diagnosed type II diabetes mellitus 215
production under anesthesia in rats 35
tolerance in obesity 261
tolerance in old age 57
turnover under anesthesia in rats . 35
Glycated albumin as indicator of metabolic control 117
Glycated hemoglobin as indicator of metabolic control 117
Glycemic control
errors in assessment of – in NIDDM 227
Glycerol
and intraperitoneal insulin infusion 155
GnRH test in obese males *261*
Gonadotropin in obese males 261
Guar pasta for obese subjects 77

H

Hand-grip test
in type I diabetics 279, 373

HbA_{1c}
and CSII treatment 1
and intraperitoneal insulin infusion 155

HBcAb
in diabetic patients 29

HBsAb
in diabetic patients 29

HBsAg
in diabetic patients 29

HDL cholesterol
and intraperitoneal insulin infusion 155
and metabolic control 127

Hepatic glucose production in recently diagnosed type II diabetes mellitus . . 215

Hepatitis B virus
in diabetic patients 29

High protein diet in diabetic rats . . . 107

Hydramnion in pregnant diabetics . . 301

Hyperglycemia
and mean red cell volume . . . 249
in old age 57

Hyperglycemic clamp
in recently diagnosed type II diabetes mellitus 215

Hypesthesia
in newly diagnosed diabetes mellitus 69

I

Impaired glucose tolerance
in old age 57

Implantable devices
and lipid metabolism 155
and metabolic control 155
intraperitoneal insulin 155

Insulin antibodies
during SHI administration . . . 101

Insulin immunogenicity
in type I diabetics 309

Insulin receptors
effects on – of glibenclamide and diet control 233
in recently diagnosed type II diabetes mellitus 215

Insulin release
after arginine plus hCT 13
after glucose plus hCT 13
after glucose plus ranitidine . . 165
after IVGTT and baclofen . . . 23
and cholecystokinin analogs . . 239

Insulin resistance
in recently diagnosed type II diabetes mellitus 125

Insulin secretion
in recently diagnosed type II diabetes mellitus 215

Intraperitoneal (i.p.) insulin infusion . . 155
for the pregnant diabetic patients . 201

Intravenous insulin infusion
for the pregnant diabetic patients . 201

Islets of Langerhans 239

Isolated pancreatic B-cells
a new method for isolation . . . 43
ultrastructure 43
viability 43

Isolation of islets
a new method 43

Isometric exercise
in young insulin dependent diabetics 193

I.v. glucose tolerance test
and baclofen 23
and hCT 13

K

Kallikrein
plasma, glandular and urinary – in renal hypertrophy . . 253

Kidney weight
in streptozotocin-diabetic rats . . 253

L

LDL cholesterol
and metabolic control 127

Left ventricular function
during handgrip exercise . . . 193
in diabetic patients 185

Lipid concentration
and BHI 63

Lipoprotein lipids
and metabolic control 127

Liver cirrhosis
in diabetic patients 29

Lying to standing test
in type I diabetes mellitus . . 279, 323

M

Macrovascular disease in diabetes mellitus
a book *182*

Malnutrition related diabetes mellitus . 91

Mann-Whitney test 279, 323

Meal test in obese patients 77

Mean blood glucose (MBG)
and CSII treatment 1

Metabolic clearance rate of glucose
in recently diagnosed type II diabetes mellitus 215

Metabolic control
and chronic continuous intraperitoneal insulin infusion 155
and CSII treatment 1
and HDL_2-cholesterol in type I diabetes mellitus . . . 127
and SHI administration 101
comparison of glycated hemoglobin and albumin 117

Metabolic risk factors for the development of late complications in type I diabetics 351

Microcirculation in diabetic rats . . . 83

Microinfusors
and lipid metabolism 155
and metabolic control 155
for the pregnant diabetic patient . 201
intraperitoneal insulin 155
of insulin: a long-term study . . 1
s.c. insulin 155

Microproteinuria
effects of pentoxifylline 171

MODY in the tropics 91

Molecular transit
in diabetic rats 83

Motor conduction velocity
in newly diagnosed diabetes mellitus 69

Multiple linear regression 339

Muscle weakness
in newly diagnosed diabetes mellitus 69

M-value
and CSII treatment 1

Myocardial perfusion
during cold stress in diabetic patients 185

Myocardial scintigraphy (Thallium-201)
during cold stress in diabetic patients 185

N

Nerve conduction
in tropical diabetes 135

Nodular skin lesions
in CSII treatment 1

O

Ob/Ob mice
and isolation of islets 43

Obesity
and guar pasta diet 77
and the impaired pituitary-gonadal axis 261

Ocular manifestations of diabetes
a book *183*

Old age
and glucose tolerance 57

Oral glucose tolerance test (OGTT)
and ranitidine infusion 165
in old age 57

O_2-uptake
in pancreatectomized rats . . . 291

Overweight
and pituitary-gonadal axis . . . 261

Oxidative metabolism
in pancreatectomized rats . . . 291

P

Pain
in newly diagnosed diabetes mellitus 69

Pancreas weight
in BB Wistar rats under high protein diet 107
in streptozotocin induced diabetes under high protein diet 107

Pancreatectomized rats
oxidative metabolism of submandibular gland and testes . 291

Pancreatic insulin
in BB Wistar rats under high protein diet 107
in streptozotocin induced diabetes under high protein diet 107

Paresthesia
in newly diagnosed diabetes mellitus 69

Pasta 77

Pearson correlation coefficient 193

Pentoxifylline
and proteinuria in type I and type II diabetic patients 171

Peripheral nerve abnormalities
in diabetic children 69

Peripheral neuropathy
in tropical diabetes 135

Pituitary-gonadal axis of obese males
role of overweight and glucose tolerance 261

Plasma C-peptide
after IVGTT and baclofen . . . 23

Plasma glucose
in BB Wistar rats under high protein diet 107
in streptozotocin-induced diabetes under high protein diet 107

Porcine monocomponent insulin immunogenicity 101

Postural hypotension
in type I diabetics 291

Pregnancy, diabetes and birth
a book *182*

Pregnancy in diabetic patients
and amniotic fluid prolactin . . 301
treatment with continuous insulin infusion 201

Prolactin
amniotic fluid – in pregnant diabetics 301
in diabetes mellitus 51
in obese males 261

Propranolol
effect of – on tests for autonomic neuropathy 141

Proteinuria
effects of pentoxifylline 171

Prothrombin activity
in diabetic patients 29

R

Ranitidine
its role on insulin, glucose and C-peptide levels 165

Red cell volume
in diabetes mellitus 249

Renal failure and diabetic ketoacidosis . 369

Renal hypertrophy
plasma, glandular and urinary kallikrein in – 253

Reproducibility of cardiovascular autonomic tests
in type I diabetics 291

Respiratory arrhythmia
in diabetic autonomic neuropathy . 141

Retroperitoneal fat weight
in BB Wistar rats under high protein diet 107
in streptozotocin-induced diabetes under high protein diet 107

R-R variability
in diabetic autonomic neuropathy . 141

S

Seconal
and glucose turnover in rats . . 35

Semisynthetic human insulin (SHI)
immunogenicity 101

Sensory conduction velocity
in newly diagnosed diabetes mellitus 69

Serum alanine amino-transferase
in diabetic patients 29

Serum aspartate amino-transferase
in diabetic patients 29

Serum insulin
in BB Wistar rats under high protein diet 107
in streptozotocin induced diabetes under high protein diet 107

Serum lysosomal enzymes
as indicators of metabolic control . 117

Sex hormone binding globulin (SHBG)
in obese males 261

Sodium valproate
and prolactin release in diabetes mellitus 51

Spearman's index 261

Streptozotocin-induced diabetes
α_1-acid glycoprotein in – 243
and high protein diet 107
renal hypertrophy in – 253

Student's t-test 1, 13, 43, 51, 65, 101, 127, 137, 155, 165, 171, 193, 201, 215, 227, 239, 243, 249, 253, 261, 291, 345, 351

Subcutaneous insulin infusion
for the pregnant diabetic patient . 201

Submandibular gland
oxidative metabolism of –
in pancreatectomized rats . . . 291

Sugar moiety
in streptozotocin diabetic rats . . 243

T

Testes
oxidative metabolism of –
in pancreatectomized rats . . . 291

Testosterone in obese males 261

The diabetic pancreas
a book *273*

TRH test in obese males 261

Triglycerides
and BHI in type I diabetes . . . 63
and guar pasta diet in obese subjects 77
and intraperitoneal insulin infusion 155
concentration and metabolic control 127

Tropical diabetes
and peripheral neuropathy . . 91, 135

Type I diabetes mellitus
and apolipoproteins 63
and BHI 63
and cellular immune response to insulin 309
and cholesterol 63
and CSII treatment 1
and glucagon test 345
and intraperitoneal insulin infusion 155
and lipid concentrations 63
and lipoprotein lipids 127
and triglycerides 63
autonomic neuropathy . . . 279, 323
in the tropics 91
left ventricular function . . . 185, 193
pentoxifylline and microproteinuria 171

Type II diabetes
effects of glibenclamide on insulin receptors in – 233
errors in assessment of glycemic control 227
glucose production 215
hyperglycemic clamp 215
insulin receptors 215
insulin resistance 215
insulin secretion 215
insulin treated –: C-peptide response to glucagon 345
in the tropics 91
pentoxifylline and microproteinuria 171

U

UDP-galactose 4-epimerase
and streptozotocin diabetic rats 243

Unstable diabetes
and intraperitoneal insulin infusion 155

V

Valsalva maneuver
in diabetic patients . . 185, 279, 323

Vasomotor reactivity
in diabetic patients 185

VLDL triglycerides
and metabolic control 127

W

Wilcoxon-Mann-Whitney-test . 107, 279, 323
